We are so grateful for all of SLT's help - finding and getting our daughter a nursery in two weeks was no mean feat.

Starting your child's education journey

Your child's time at nursery should be fun and informal but plays a key role in unlocking their potential and preparing them for their next educational steps. It builds confidence, improves language and social skills, helps develop their imagination and strengthens other key skills.

Finding the right nursery place

Location is always a factor but it's only one element in the jigsaw. Other important considerations are the atmosphere and ethos of the nursery, the experience of the Principal and staff and how many children are in each class. Links with preparatory schools should also be assessed if you're looking at

a nursery as a route to a particular school. It's also worth remembering that competition for half-day places is always high and that full-day attendance can be particularly helpful if English is not your child's first language.

Getting a place at the nursery of your choice

Expert input can make all the difference in securing a place at the nursery that's right for your child. It can help you navigate the choices no matter whether you are looking to register your child at a nursery at birth, have just moved to a new area or are up against a really tight deadline.
