Entrance exams and choosing your next school

- » Finding the right school for your child
- » 11+ and 13+ entrance exams and interviews
- » Helping you to get the best for your child

SLT was so helpful. Our original list of schools quickly shortened as we realised they would not be supportive enough for our son. SLT helped us draw up a new list and secure a place at a really lovely school.

Mrs K P, London
parent of son age 10

Finding the right school for your child

The key to preparing for success at secondary school is identifying the learning and pastoral environment that best suits your child's character and abilities. That means looking beyond the prospectus and taking advantage of as much 'behind the scenes' information as you can.

Our educational consultancy team's unrivalled knowledge of the many UK private and selective state secondary schools means we can draw up an effective shortlist of those which will best suit your child.

11+ and 13+ entrance exams and interviews

The 11+ tests English, Maths and verbal and non-verbal reasoning. 13+ covers English, Maths and

Science plus further papers chosen from French, Geography, German, Classical Greek, History, Latin, Religious Studies and Spanish. Some schools (Eton for example) have their own additional entrance requirements and pre-tests. Our dialogue with the admissions teams gives us a clear understanding of what's needed for each school.

Helping you to get the best for your child

Tutors can help maximise success and we recommend a gentle programme of preparation starting 12 – 18 months ahead of any exams.

SLT represents specialist tutors with extensive experience of preparing students for both ISEB exams and school-specific entry.
